Kunal.gautam.570@gmail.com

Full Stack Software Engineer with 6+ years of experience designing and delivering cloud-native, high-traffic web applications using React, Node.js, Java, and AWS/GCP. Specialized in microservices architecture, frontend performance optimization, and end-to-end product ownership. Experienced in leading technical efforts across cross-functional teams in fast-paced Agile environments.

WORK EXPERIENCE

Hashedin By Deloitte, Gurugram — *Software Developer II*

May 2022 - PRESENT

- Designed and developed full-stack features using React.js, TypeScript, Node.js, and GraphQL, serving 50,000+ concurrent users across business-critical workflows.
- Led frontend architecture decisions including component library design, Redux/Context API state management, and performance optimizations (code splitting, lazy loading, memoization), reducing page load time.
- Architected and maintained REST and GraphQL APIs with Node.js and Express, covering authentication (JWT/OAuth), data modeling, and error handling for high-load production systems.
- Deployed and managed microservices on AWS (Lambda, EC2, S3, API Gateway) and GCP (Cloud Run, Firebase), ensuring uptime and horizontal scalability.
- Designed and implemented CI/CD pipelines using GitHub Actions, Jenkins, and Terraform.
- Owned end-to-end release management: development, deployment, and production monitoring via CloudWatch, New Relic, and ELK stack.
- Mentored 3–4 junior developers through code reviews, onboarding documentation, and reusable architecture patterns..
- Collaborated with product managers, designers, and QA to translate business requirements into scalable technical specs, consistently delivering features on schedule.

Tech Stack: React.js, TypeScript, Java, Python, Node.js, Express.js, GraphQL, REST APIs, AWS, GCP, Docker, Terraform, Jenkins, PostgreSQL, MongoDB, Redis, GitHub Actions, Jest, Agile/Scrum, Jira.

Extramarks, Noida — Frontend Engineer (E-Learning Platform)

Nov 2021 - May 2022

- Developed and maintained frontend modules for a live e-learning platform supporting thousands of concurrent users, using React.js, Redux, and JavaScript.
- Integrated real-time communication via WebSockets for live classroom features including teacher-student interaction, polling, and Q&A.
- Refactored legacy codebase to modern React architecture using Hooks and Context API, improving performance and long-term maintainability.
- Built reusable UI components aligned with the design system, reducing duplication and accelerating feature delivery across the platform.
- Wrote unit and integration tests with Jest, maintaining high UI reliability and regression safety.

Tech Stack: React.js, Redux, JavaScript, WebSockets, HTML5, CSS3, Firebase, REST APIs, GitHub, Jest, Agile/Scrum

Ingenuity Gaming, Noida — *Associate Frontend Developer*

Feb 2020 - Nov 2021

- Engineered interactive web-based applications using JavaScript, React.js, and HTML5 Canvas, focusing on responsiveness and high frame-rate rendering.
- Implemented custom UI components, user flows, and frontend logic for high-load environments with complex state management.
- Worked on performance tuning, including asset optimization, efficient DOM updates, lazy loading, and memory management.
- Consumed and integrated RESTful APIs for real-time data and transactional flows such as in-app purchases, point tracking, and dynamic content loading.
- Collaborated cross-functionally with QA and backend teams to ensure end-to-end feature delivery with clean UI/UX integration.
- Participated in internal tool building and framework enhancements to reduce development time for similar UI projects.

Tech Stack: JavaScript, React.js, HTML5, CSS3, REST APIs, Webpack, Git, Agile/Scrum, Canvas/WebGL.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Java, Python, C++, SQL
- **Frontend:** React.js, Next.js, Redux, Context API, HTML5, CSS3, Tailwind CSS, Responsive Design, Cross-Browser Compatibility, UI Performance Optimization
- **Backend:** Node.js, Express.js, GraphQL, REST APIs, WebSockets, JWT, OAuth, Firebase Auth
- **System Design:** Microservices Architecture, Event-Driven Design, API Gateway Patterns, Database Schema Design
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, API Gateway), GCP (Cloud Run, Firebase), Azure, Docker, Terraform, CI/CD (GitHub Actions, Jenkins)
- **Databases:** PostgreSQL, MongoDB, Redis
- **Testing & Debugging:** Jest, React Testing Library, Chrome DevTools, Postman
- **Tools & Practices:** Git, GitHub, Jira, Webpack, Babel, Agile/Scrum

PROJECTS

Enterprise Admin Dashboard

Stack: React.js, TypeScript, Redux, Tailwind CSS, REST APIs

- Built a modular, responsive admin panel with 25+ reusable UI components, enabling scalable reuse across multiple internal tools.
- Implemented role-based routing, dynamic form rendering, and controlled component patterns for complex access workflows.
- Achieved 30% faster UI render performance through virtualized tables, lazy loading, and memoization.

UI Component Library for Design System

Stack: React.js, TypeScript, Storybook, SCSS Modules

- Designed and built a themeable, accessible internal component library (buttons, modals, forms, toasts) adopted across multiple teams.
- Used Storybook for interactive documentation, significantly improving developer onboarding speed.
- Standardized UI components across teams, reducing design debt and UI bug count.

EDUCATION

B.Tech in IT

Galgotias College of Engineering & Technology

2020
